Journal Scientific International Environmental Green Horizon

Vol. 2 Num. 1 – 2023

The **Journal Scientific International Environmental Green Horizon** is a prominent open access academic journal, with a consolidated presence in Peru and Argentina, and projecting its influence worldwide. Its fundamental mission is to promote synergy between **Environmental Science and Development**, contributing to the advancement of knowledge in these fields. The journal is distinguished by the publication of articles that explore the frontiers of environmental sciences and development, addressing cutting-edge topics.

To guarantee the quality of the content, all works submitted to the magazine are rigorously evaluated by technical committees of both the magazine itself and the association that supports it. This review process ensures the academic excellence and relevance of the published articles, which strengthens the credibility and impact of the journal in the scientific community.

The **Journal Scientific International Environmental Green Horizon** intended audience is diverse and includes leading researchers, leaders and operators in fields related to environmental innovation, management and technology. It also extends to designers and developers interested in the intersections between environmental science and sustainable development. With this wide audience, the journals is positioned as a meeting point for the dissemination of knowledge, experiences and advances in the environmental and development field at a global level.

 **Dr. Luis Eduardo Ore Cierto** ^a

Editor in chief of the scientific journal
